Subject: Microsoft Settlement

I just wanted to say that, from what I've read and seen, I haven't been able to see what the punishment for Microsoft's illegal behavior has been. Putting in requirements that they obey the law in the future (with a panel who has, as far as I can tell, little actual power) is something that they must do anyway. Some form of punitive punishment should be enacted so that Microsoft will think twice before breaking the law again.
